

Rippa Grippa

Block Grab

- No more back injuries
- No more crushed fingers
- No more damaged blocks
- Increased productivity
- A safe easy way to handle large masonry, bluestone slabs or stone walling blocks and ease the O.H.S. & W issues on any construction site

The **Rippa Grippa™-Block Grab** has been designed for ease of operation. Attach to any mini skid steer, large skid steer loader, front end loader, back hoe or excavator to the auxillary hydraulics and away you go.

Width:- 150 mm
 Grab Opening:- 95 mm – 440 mm
 SWL:- 100 kg.

The Rippa Grippa™ - 'Mega' Block Grab,

like it's little brother, it too has been designed for ease of operation, with a larger jaw capacity and hydraulics, for the mega masonry block handling jobs.

Width:- 250 mm

Grab Opening:- 95 mm – 600 mm

SWL:- 250 kg.

Attach to any large skid steer loader, front end loader, back hoe or excavator to the auxillary hydraulics and away you go.

Lifting Jibs are available for all skid steer loaders and are recommended to increase the flexibility of reach out and up.

Designed and Manufactured in Australia.
