

Rippa Grippa

Sleeper Grab

- No more back injuries
- No more crushed fingers
- No more damaged sleepers
- Increased productivity
- A safe easy way to handle sleepers and support steel and ease the O.H.S. & W issues on any landscape site

The **Rippa Grippa™-Sleeper Grab** has been designed for ease of operation. Attach to any mini skid steer, large skid steer loader, front end loader, back hoe or excavator to the auxillary hydraulics and away you go.

Width:- 800 mm
 Grab Opening:- 10 mm – 180 mm
 SWL:- 200 kg.

Lifting Jibs are available for all skid steer loaders and are recommended to increase the flexibility of reach out and up.

The **Rippa Grippa™-Sleeper Grab** is ideal for shifting retaining wall steel around on site and making it a lot easier to place the steel in the hole.

Safety / antisway chains from the **Rippa Grippa™-Lifting Jib** to the **Sleeper Grab** ensures that the load is kept secure while moving on site

Utilising **Rippa Grippa™-Lifting Jib** with the swivel boom, the **Sleeper Grab** is able to remove or place sleepers and steel in those hard to get at places.

Designed and Manufactured in Australia.
